

Environmental Management Plan

Environmental Policy

Abell Point Marina undertakes all activities in compliance with relevant state/ federal legislation.

Abell Point Marina is committed to promoting and delivering the best environmental management practices, ensuring the long-term health of the environment and public is maintained across all operations and activities.

Abell Point Marina acknowledges responsibility for environmental sustainability and recognises the relationships that exist between the key areas of energy, water, waste, health and the marine environment. Abell Point Marina aims to ensure all employees, contractors and guests of the marina understand and uphold the highest environmental management practices when within the marina precinct.

Environmental Goals

Abell Point Marina conducts daily operations in line with our environmental goals, which are:

- Reduce waste and reuse/ recycle where possible.
- Minimise the effects of marina activities on water, air and noise pollution.
- Reduce energy, water and waste consumption across marina operations.
- Educate customers, employees and marina stakeholder on conservation of marine ecosystems and marine life.
- Promote activities which reduce marine habitat disturbance, protect native flora and fauna and encourage sustainable boating practices.
- Advocate sustainable vessel operations and maintenance practices.

Environmental Initiatives

Our marina rules outline the set of environmental standards which apply to marina guests, contractors and businesses. These rules include information relating to the following key environmental initiatives:

1. Plastic Bag Free
2. Reduction of Energy, Water, Noise Pollution
3. Nil Discharge/ Black Water Pump-Out
4. No Fishing
5. Recycling/ Waste Transfer
6. The Last Straw Campaign
7. Sustainable Vessel Operations
8. Sustainable Vessel Maintenance Practices

Our Berthing Agreement includes the comprehensive list of marina rules, should you require additional copies please speak with our Customer Relations team.

Environmental Resources
